ADJUSTABLE POLYMER “POKER CHIP” DISH DOLLY PCD SERIES with *Microban® Antimicrobial Product Protection

- **Microban® Antimicrobial Product Protection:** Polymer surfaces have built-in Microban® Antimicrobial Product Protection which inhibits the growth of bacteria, mold, mildew, and fungi that cause odors, stains, and product degradation.
- **Unique Design:** System of adjustable, removable dividers and removable tower promote flexibility and maximum loading density. Adjustments to dividers are made on underside of chassis to minimize tampering with settings.
- **Flexible:** Facilitates storage and handling of dishes, from fruits to dinner plates. Can accommodate multiple size dishes.
- **Adjustable:** Dividers and tower compensate for changes in dishes, and situations where dolly selection/specification is done prior to dish selection.
- **Sturdy Containment:** Columns of dishes are held safely within the borders of the dolly, preventing spillage and breakage.
- **Sanitary:** Dividers and tower are removable to facilitate dolly cleaning. Vinyl cover protects clean dishes during storage.
- **Cost Efficient:** Two-handed access to each dish column minimizes dish breakage and promotes quick table set ups. High-storage density means fewer dollies required.
- **Durable Construction:** High-density polymer shell makes dish dollies resistant to cracking, peeling or chipping. Includes integrally-molded bumpers.
- **Maneuverable:** 5" (127mm) diameter swivel casters (two with brakes) with neoprene wheels provide easy rollability and positioning.
- **Compact Design:** Dolly stores conveniently under counters.
- **Vinyl Cover:** Protects clean dishes from dust and water splashes while in storage. Cover is provided with each dolly.
- **NSF Listed.**
